Lenny S, Kevin D, and Esmeralda all set NEW RECORDS. Jill's time ain't bad, either!

The Race Director comments: This year's event was a revelation, almost like the calm after the (threatened) storm. Three course records were set, namely – LENNY STAATS in the 6-mile (GPS-certified) at 47:52; KEVIN DONOHER in the 9-mile (1:01:47), and ESMERALDA MARTINEZ-RAMOS (1:12:52) also 9-miles.

Where there were 2 sets of flags (to go right or left) there was apparent confusion. Also, in the 9-mile going east and out of the canyon, the junction with the "Gunny" trail coming in from the north (left) there was a question where to go. Maybe the most important instruction given was to "just get back to your car."

Two runners didn't come thru the finish line, and may have come up the road. Their time was listed as 'unknown.' EVERYONE deserves to be recognized, regardless of her/his time; to run these trails is a real achievement.

One lady runner apparently was picked up down below in the Tabeguache trail(s) area and probably was in touch by cell phone. It was special to have 16 lady runners (17 male) – this proves the old adage "you can't keep a good woman down." Two people were listed as D N F for physical reasons.

\*The editor has been (incorrectly) calling these 7- and 11-mile runs. That was probably true of the original (start/finish down off Monument Road) courses.
